DL24EW 150W Smart Power Electronic Load Tester

☐ Non-WIFI version   ☐ WIFI version

Technical parameters

Test voltage:**2-200V**

Working current: **0.2-25A**

Discharge power:

Voltage X Current **<150W**

Constant Load

Regulation:**+3% + 3 bytes**

DC5.5 Test inputs

MiNi USB Test inputs

Micro USB Test inputs

Type-C Test inputs

I+
V+
V-
I-

Is=00.000A   CC ✶🅱
Vol:4.7728v   Time discharge
Cur:0.0000A   99:59
Pwr:0.0000w   Cut off voltage
Res:0.0000Ω   <04.2v
Ene:0.0000wh   CPU Temp:021.3℃
Cap:0.0000mAh Fan Temp:9999mΩ
Timing:000:23:00T Ex.Temp:68.3℃   ON

Two input connection methods

(1)
2-wire connection method

(2)
4-wire connection method

(1)2-wire wiring method: This method is rlatively simple and convenient.I+ and V+ are shorted, I- and V- are shorted, the two holes are combinedinto oneConnect to the I+ and I- terminals

(2) 4-wire connection method: voltage measurement is not afected bythe voltage drop of the wireThe infuence of voltage measurementismore accurate. It is recommended to have a certain circuit baseBasicusers use this method

Product the power supply input port (12V/1A)

Outer NTC temperature probe socket

System sound speakers

Encoder knob

Multifunction button

External charging control switch module

DC charger

Connect the battery professional charger

Reminder: need to order

Notes:

This meter Only supports 2.4G Wireless Network, NOT for 5G

Be sure to turn on the phone's Bluetooth mode and GPS positioning

Works with Tuya   Works with Smart Life

Please search for **tuya** name or **smart life** name in Google Play or Apple Store Download app and install!

Support andorid 5.0 above app and IOS 8.0 above APP! Mobile and computer APP software download address: http://www.atorch.cn
